I'm trying to

find a tool to predict
my admission chances

But

I am

a
student

I'm trying to

use a website to
predict my total
scores and show me
the percentage of
chance to get into
university of my
choice

But

It is taking
too long to
load
answer

Because

the website
is not
responsive

Which makes me feel

Frustrated and
still confused if
I should apply
